Unlock the Power of
SureMDM InLocate
Real-Time Indoor Tracking of Devices

Locating lost or missing mobile devices in the workplace is a major operational concern!

- Over **70 million** cell phones are lost every year
- **4.3%** of corporate-issued cell phones are stolen each year
- **52%** of devices are stolen from the workplace and another **24%** from conferences
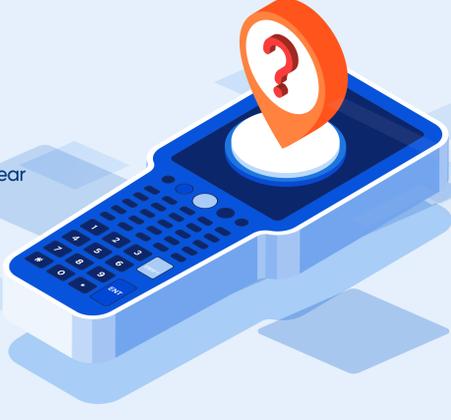

What challenges does a business encounter when devices are lost or stolen?

Loss of Productivity
The annual cost of missing rugged equipment ranges from tens of thousands to millions of pounds due to lost productivity.

Disrupted Operations
A lost mobile device disrupts operations, leading to loss of productivity and a negative impact on customer experience.

Loss of Time
Tracking missing devices consumes both operative and managerial time, often totaling several hours per misplaced device.

Financial Losses
Replacing lost handheld terminals is costly, as businesses may need to shell out at least $2,500 per device!

Security Risks
Lost mobile devices may expose sensitive customer or business data to hackers, leading to financial and legal consequences.

Introducing SureMDM InLocate: Track and Locate Misplaced Devices

Real-Time Location Tracking
Identify the precise position of mobile devices in real time so that IT administrators are always aware of their whereabouts

Remote Buzz
Activate an alarm on a misplaced device to assist you in rapidly locating it

Real-Time Insights
Gain important information about how devices are used, their movement, and ensure all devices are visible and accessible at all times

Historical Location Data
Use historical location data to identify locations where devices tend to get misplaced, and reassign unused devices to other rooms or locations

Geofences
Create virtual barriers to restrict the mobility of devices and enforce security protocols

Visual Heatmaps
Access visual heatmaps of the facility to find immobile devices, and identify locations with poor WiFi signals to ensure the best possible connectivity.

What are the benefits of SureMDM InLocate?

Always keep a track of your devices
SureMDM InLocate can locate devices by identifying their last known location. You can just walk to the spot, call the device, and locate it by sound. It can help find a device in various hidden places, even in a loaded truck.
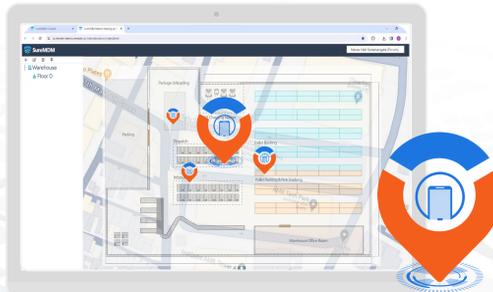

Cost Reduction
SureMDM InLocate eliminates the expense of replacing lost devices, and significantly reduces the time spent on locating missing devices, streamlining the device inventory management.

Easy Setup
SureMDM InLocate requires no complex installation steps or pricey beacons; it connects seamlessly with your current Wi-Fi infrastructure.

Increased Safety
SureMDM InLocate protects sensitive data by ensuring that you always know where your mobile devices are and thus have better control.

What are the use cases of SureMDM InLocate?

CONSTRUCTION
Reduce the chances of device loss and keep a track of devices at all times

WAREHOUSE AND LOGISTICS
Boost operational efficiency and simplify inventory management.

MANUFACTURING
Monitor equipment on large production floors and control their movement effectively
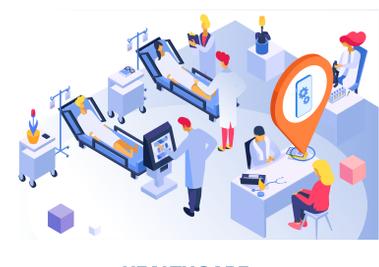

HEALTHCARE
Monitor your devices continuously, safeguard PHI (personal health information), and prevent HIPAA violations
