## CONTROL YOUR ELECTRICITY BILLS

# VERVE

Technologies

# Introduction

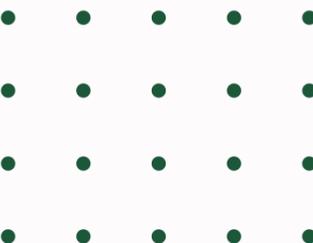

Increasing demand for energy and limited resources underline the urgent need to reduce our consumption.

# 30%

Over-consumption\*

\*Agence Marocaine pour l'Énergie Durable (MASEN), "Rapport sur l'Énergie 2022"

# Problem

## Energy wastage

Around 30% of domestic energy is wasted due to inefficient appliances and inadequate management.

## No visibility on consumption

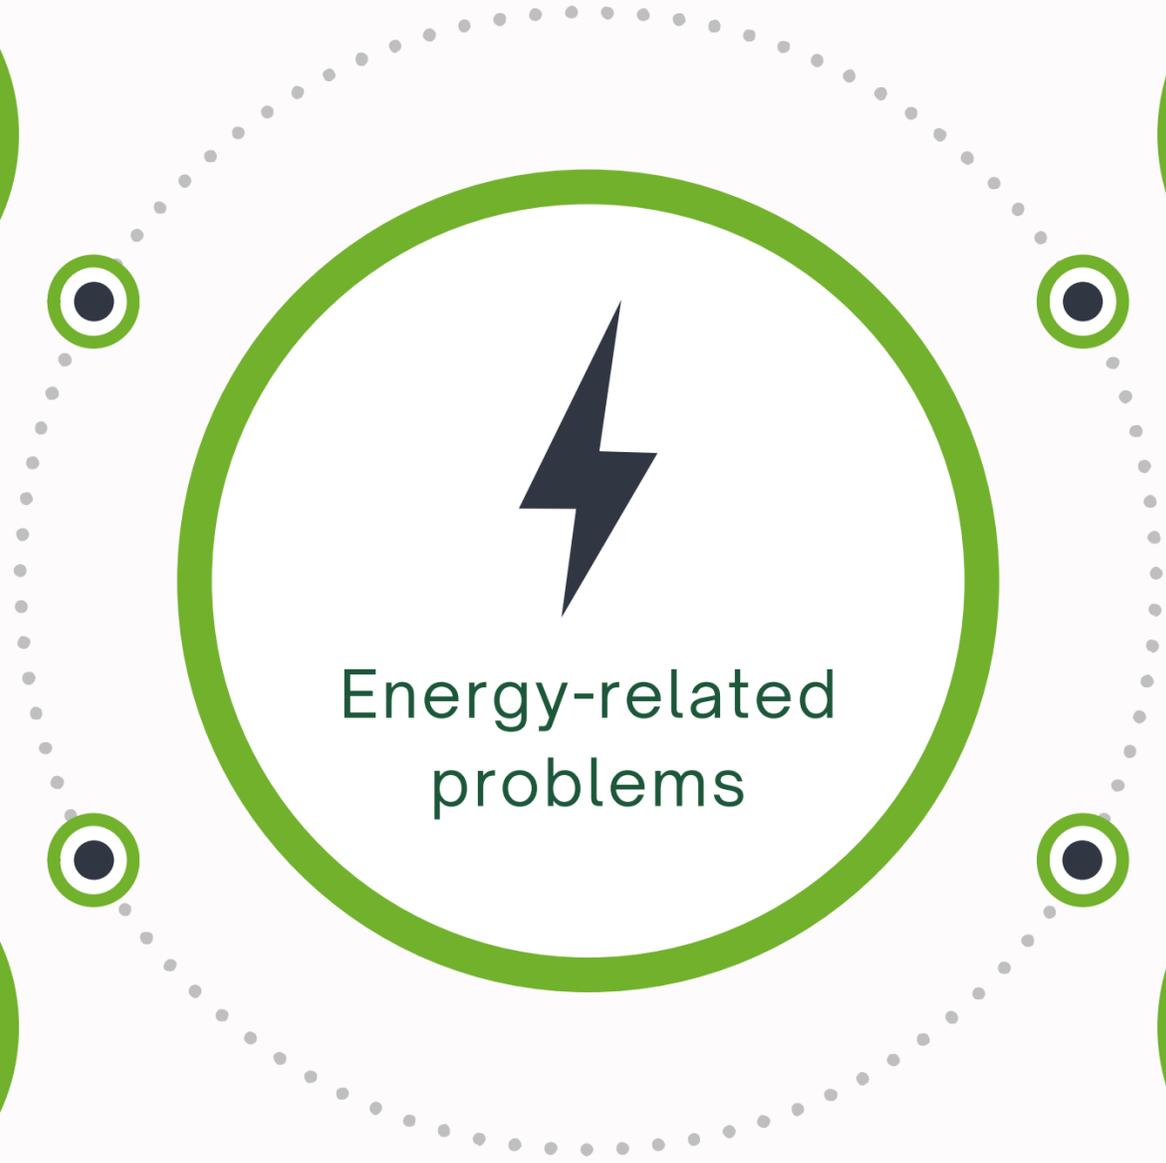

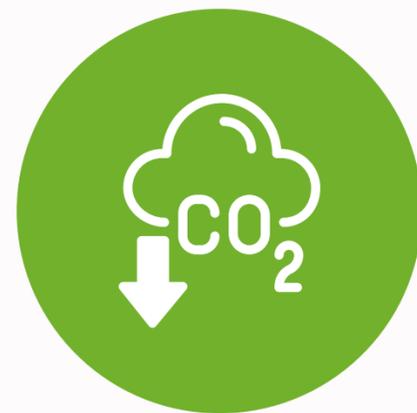

Most consumers do not have detailed, real-time information on their energy consumption.

## High energy bills

Electricity bills only provide an overall overview without detailing the sources of consumption.

## Environmental impact

Inefficient energy consumption contributes to an increase in CO<sub>2</sub> emissions.

# Solution

DariWatt is a **patented solution** that allows you, via a mobile application, to see in detail the energy consumed in your home, helping you to reduce your electricity bill.

**Track Consumption in kWh**  
in real-time via an intuitive application.

**Visualize Costs in Currency**  
adapted to your country in real-time.

**Identify Every Appliance**  
in your home using our Artificial Intelligence models.

**Visualize Statistics**  
hourly, daily and monthly basis.

**Get instantaneous Alerts**  
about energy consumption patterns or power cuts.

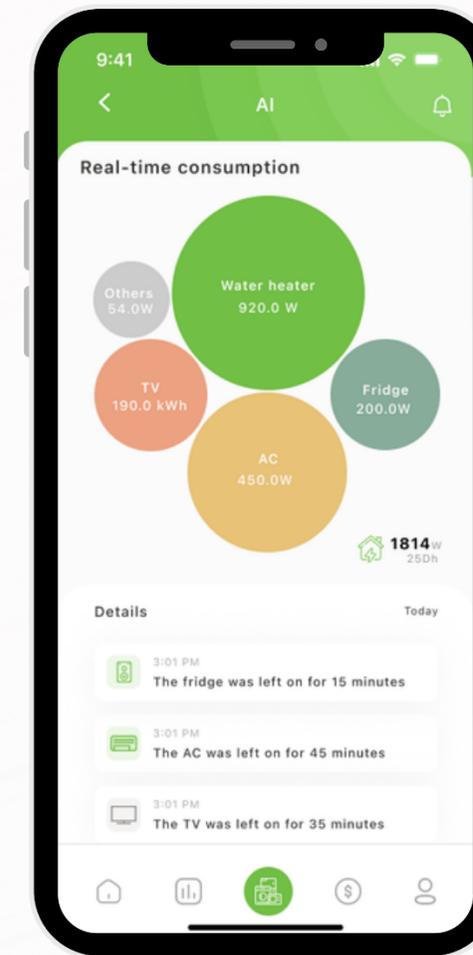

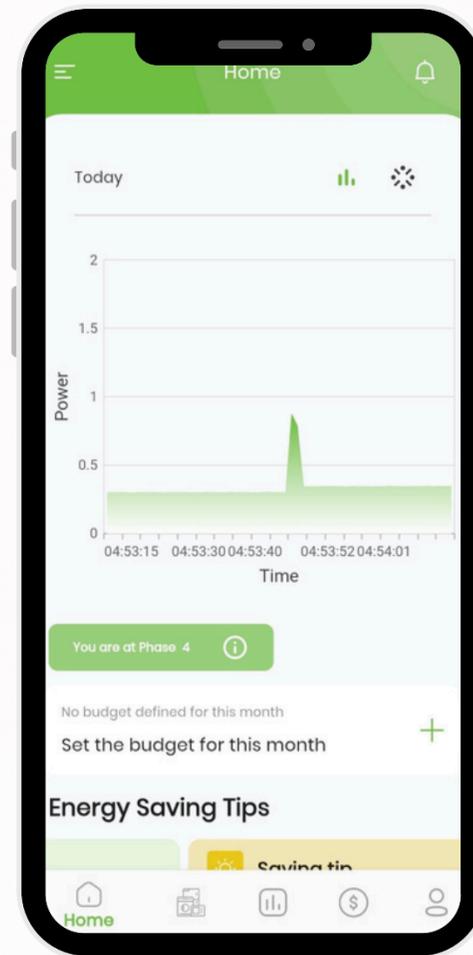

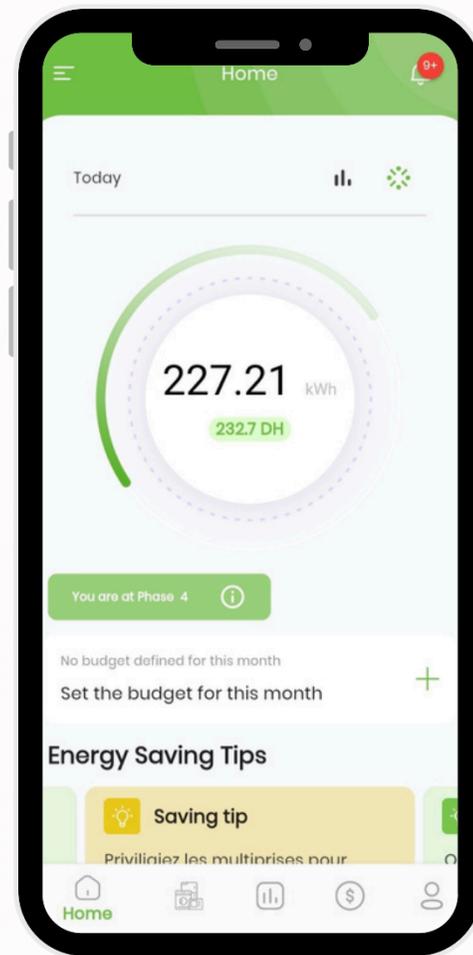

**Receive Bills in local Currency**  
based on your electricity supplier's rates.

# DariWatt functionalities

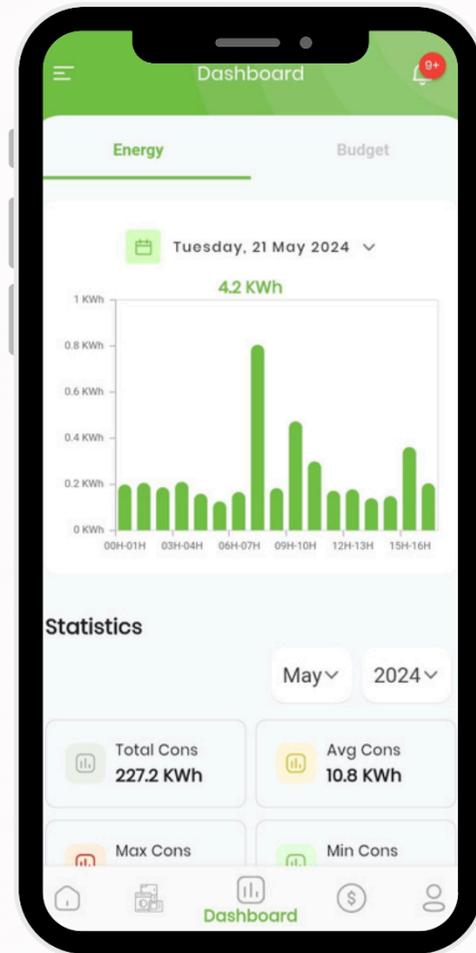

## 01 - Real-time insights

Get your electricity consumption and its conversion in to local currency. Get personalized energy-saving recommendations.

## 02 - Consumption per appliance

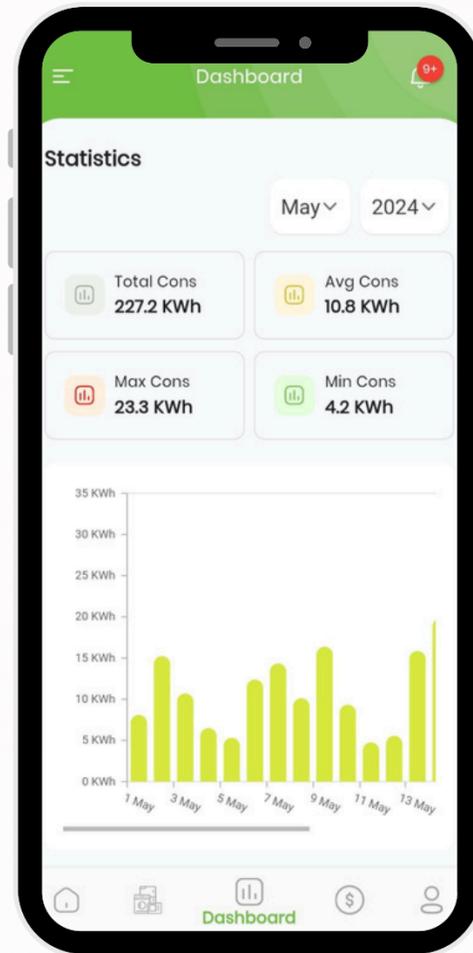

Thanks to our AI models, you'll receive consumption by appliance, so you'll know where to act to reduce your consumption.

# DariWatt functionalities

## 03 - Statistics

Dariwatt provides you with statistics on an hourly, daily and monthly basis.

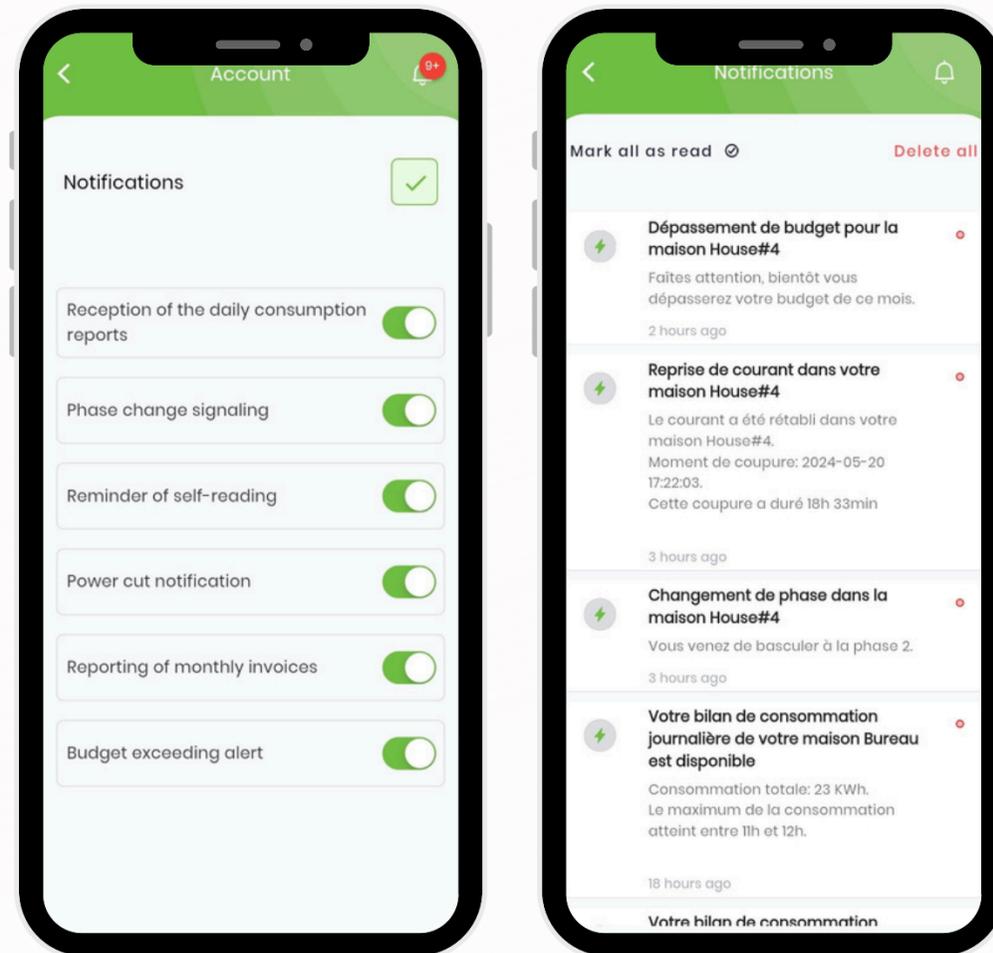

The screenshot shows the 'Budget' screen where a new budget can be set. The form includes fields for 'Name' (May), 'Desired Amount' (250 MAD), and 'Date' (2024). There are also buttons for 'May', 'Jun', 'Jul', 'Aug', and 'Sept'. A toggle for 'Early alarm percentage' is turned on, and a slider is visible. At the bottom, there are 'Save' and 'Cancel' buttons.

## 04 - Budget Control

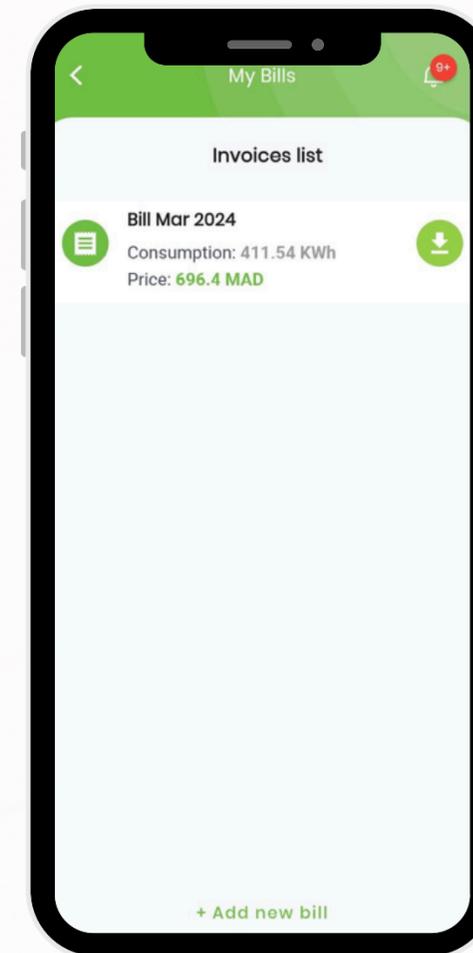

Set an amount you don't want to exceed and receive an alert once you've reached a threshold

# DariWatt functionalities

## 05 - Real-time alerts

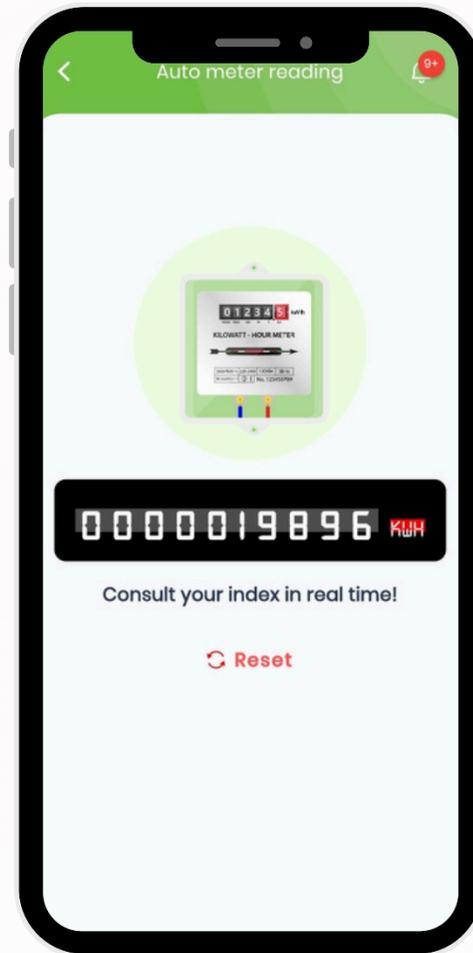

Receive instant alerts. Whether it's a power cut, loss of Wi-Fi connection, daily report, etc.

## 06 - Bills

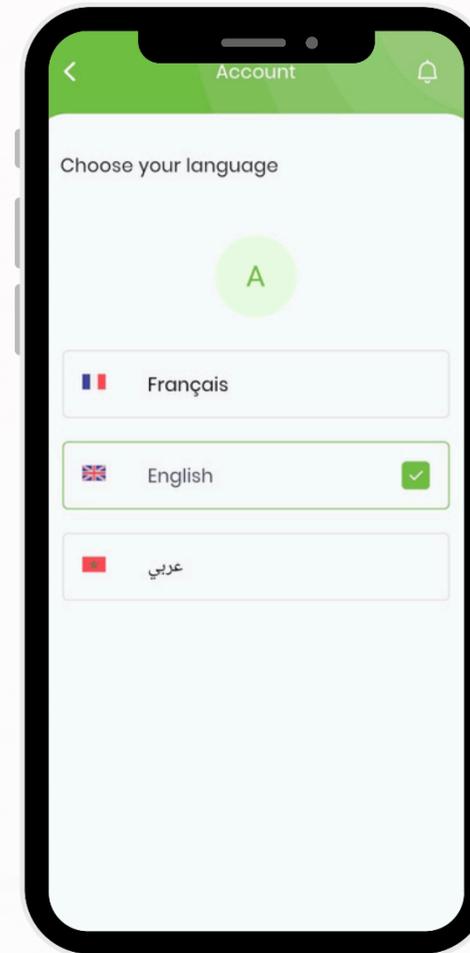

At the end of each month, you can view your bill. If you wish, you can create a personalised bill.

# DariWatt functionality

## 07- Meter index

Check your meter index at any time and transmit it to your energy supplier.

## 08 - Multi-language

Choose from 3 languages - English, French and Arabic - to suit your needs.
